

Join Ogier as we discuss the key sustainability considerations for asset managers for 2024.

Alongside Kasia Zatorska from Sustainable Investment Consulting, we shall be joined by Dr Arne Geschke from Fair Supply and discussion will be chaired by Adrian Phoon from GRC solutions.

In 2024, businesses and financial institutions are expected to embrace ESG criteria not just for compliance or risk management, but as a chance to fundamentally transform their business models to become more sustainable and increasingly more transparent.

In this webinar, Kasia Zatorska and Dr Arne Geschke will discuss:

1. key regulatory movements on sustainability in the EU, as well as Australia, Singapore, Thailand, Malaysia and Japan
2. types of ESG considerations that asset managers should be aware of
3. what kinds of effective data can be used to measure ESG risk
4. helpful tools to monitor climate change risk necessary to meet directors' duties

Chaired by Adrian Phoon, this webinar promises to be a wide-ranging topic with strong practical takeaways for asset managers and financial services professionals.
