

The Fund Finance Association recognizes the current challenges in the Fund Finance market, notably the need to increase the supply of finance available (in all forms) to support private market funds as well as continued innovative financing solutions. To that end, the '2024 Global Leadership Summit' format is designed to gather senior individuals from stakeholders from across the industry to discuss these challenges, seek consensus, and actively develop solutions to address these challenges.

James Heinicke, Laura Holtham, Christopher Jones and Jad Nader will be attending, Contact us if you would like to connect.
