

This is Ogier's dedicated hub for the Airline Economics Dublin conference 2025, where you'll find contact details for our attendees, information about our services and useful resources to assist you with your aviation objectives.

End-to-end solutions

Our integrated approach, combining the expertise of Ogier's dedicated legal experts with our corporate and fiduciary professionals at Ogier Global, ensures that our clients receive tailored, jurisdiction-specific solutions for aviation matters.

Ogier's global presence in Ireland, the Cayman Islands, Dubai and Hong Kong positions us at the forefront of innovations and regulatory changes in these key aviation markets. Our combined offering means we can support with the formation and administration of asset finance vehicles, public and private debt issuers and securitisation vehicles.

This synergy is particularly beneficial in the aviation industry, where the structuring of debt through capital markets can provide the necessary leverage for large-scale aircraft leasing operations, aligning financial strategy with asset management.
